DETAILED ACTION

1. This office action is in response to Applicant's amendment filed 09/09/06. The application contains two claims numbered 1-2.
2. Amendment to Abstract and drawings filed 9/06/06 has been entered and approved

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 2 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 2 recites the limitation "the auxiliary shelf" in line 2. There is insufficient antecedent basis for this limitation in the claim.

Claim Objections

4. Claim 2, the recitation of "an plane" (line 13) should be changed to -- a plane --. Appropriate correction is required.

Claim Rejections - 35 USC § 103

5. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over US Patent NO. 6,398,176 to Liu in view of US Patent NO. 6,488, 248 to Watt et al.

Liu teaches a support assembly comprising a mounting member (1, 11) (Fig. 1) attachable to a primary support structure (an object not shown), a first link member (2) connected to said mounting member at a first end of said first link member; a second link member (3) connected to said mounting member at a first end of said second link member; a distal bracket member (4) connected to the ends of said first and second link members distal to said mounting member; an auxiliary shelf support (5) coupled to said distal bracket member; a rotating member (53, 54) rotatably connected to said distal bracket in a manner effective to change the angle between the a plane of said auxiliary shelf and an imaginary perpendicular drawn from said primary support structure when said rotating member rotates (see also Col. 3, lines 16-23).

Liu teaches the support plate (5) (an auxiliary shelf support) including a top on which a computer keyboards, books or other articles can be placed but does not specifically recite that a substantially flat auxiliary shelf mounted on the auxiliary shelf support to support such objects.

Watt et al specifically teaches that a substantially flat auxiliary shelf (18b) mounted on the auxiliary shelf support to support keyboards or the like.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to include a flat auxiliary shelf mounted on the auxiliary shelf support as per the teaching of Watt et al. on the support plate (or shelf support) of Liu

for the desirable purpose of providing a greater support areas for the keyboards, books or any other articles to be placed upon.

Allowable Subject Matter

6. Claim 1 is allowed.

Response to Arguments

7. Applicant's arguments with respect to claim 2 have been considered but are moot in view of the new ground(s) of rejection due to new art has been discovered.

Accordingly this action is made NON-FINAL.
